INSPIRE HOLDINGS INC.

WHY CHOOSE MICRO- INVESTMENT?

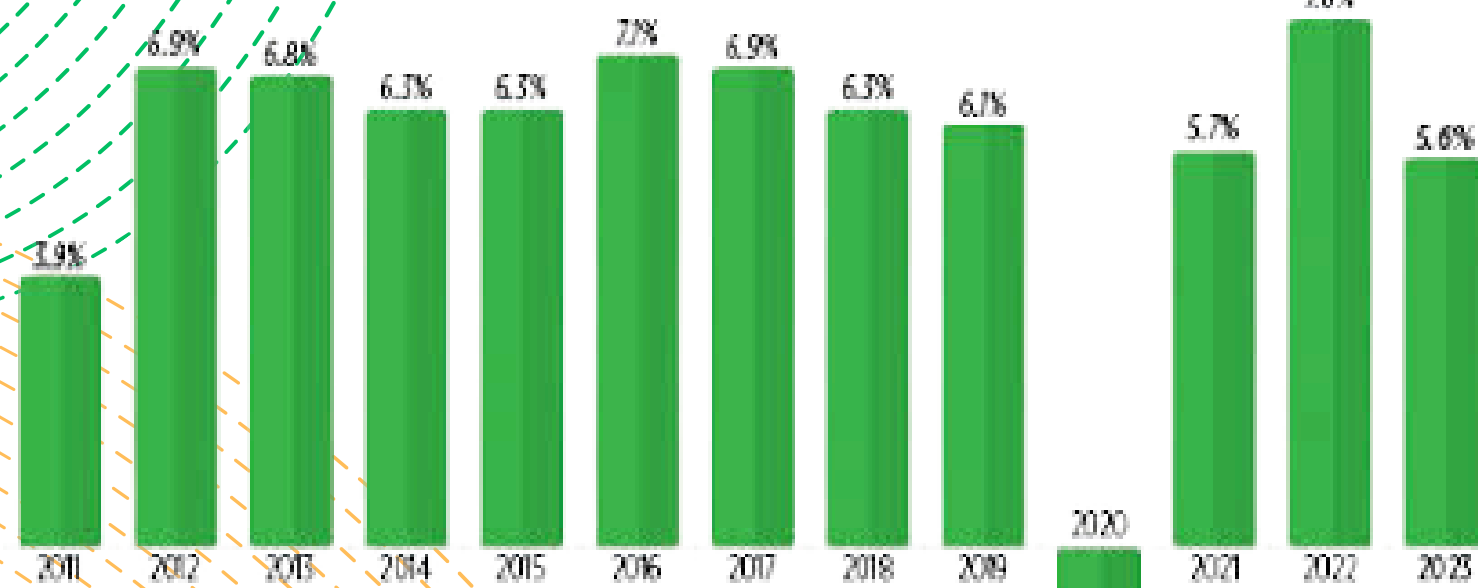

Micro-investing means investing small amounts of money, often on a recurring basis, and typically using an app to automate the process. If your budget is tight or you're feeling especially risk averse, micro-investing may serve as a viable entry point to building personal wealth.

Inspire offers micro-investing which can be a great way to get started with investing when you don't have much in savings. Consistently contributing small amounts can add up over time when invested properly, but you'll need to contribute substantially more to secure your future.

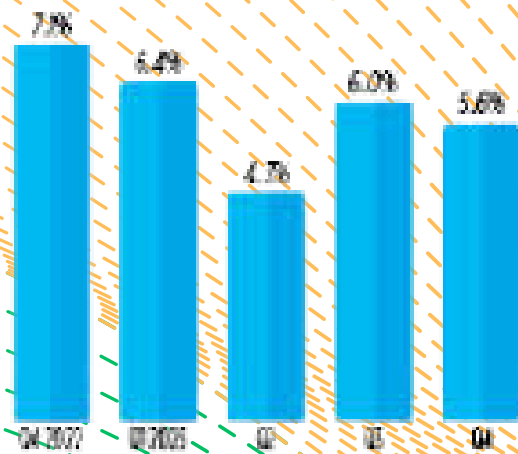

2023 PHILIPPINE ECONOMIC GROWTH SLOWS TO 5.6% (Year-on-year growth rates, at constant 2018 prices)

Philippine being the fastest growing economy across Southeast Asia with a growth rate of 5.6 percent. Just shy of the government's target of 6.0 to 7.0 percent.

Like many other economies worldwide, the Philippine economy encountered difficulties in 2023. But it is anticipated that the Philippine economy would recover and begin expanding once more in 2024. Even if there are still obstacles to be solved, positive growth in the Philippine economy is anticipated in 2024.

The chart highlights the Philippines' GDP growth, showing year-on-year changes from Q1 2021 to Q2 2024. Despite fluctuations, with a peak of 12.0% in Q2 2021 and 6.3% in Q2 2024, the country remains one of the fastest-growing economies in Southeast Asia.

The Philippines stands out as one of the fastest-growing economies in Southeast Asia, driven by a combination of strong domestic consumption, significant infrastructure investment, and a vibrant digital landscape. With a young and dynamic population, the country benefits from a growing workforce that fuels consumer spending and innovation.

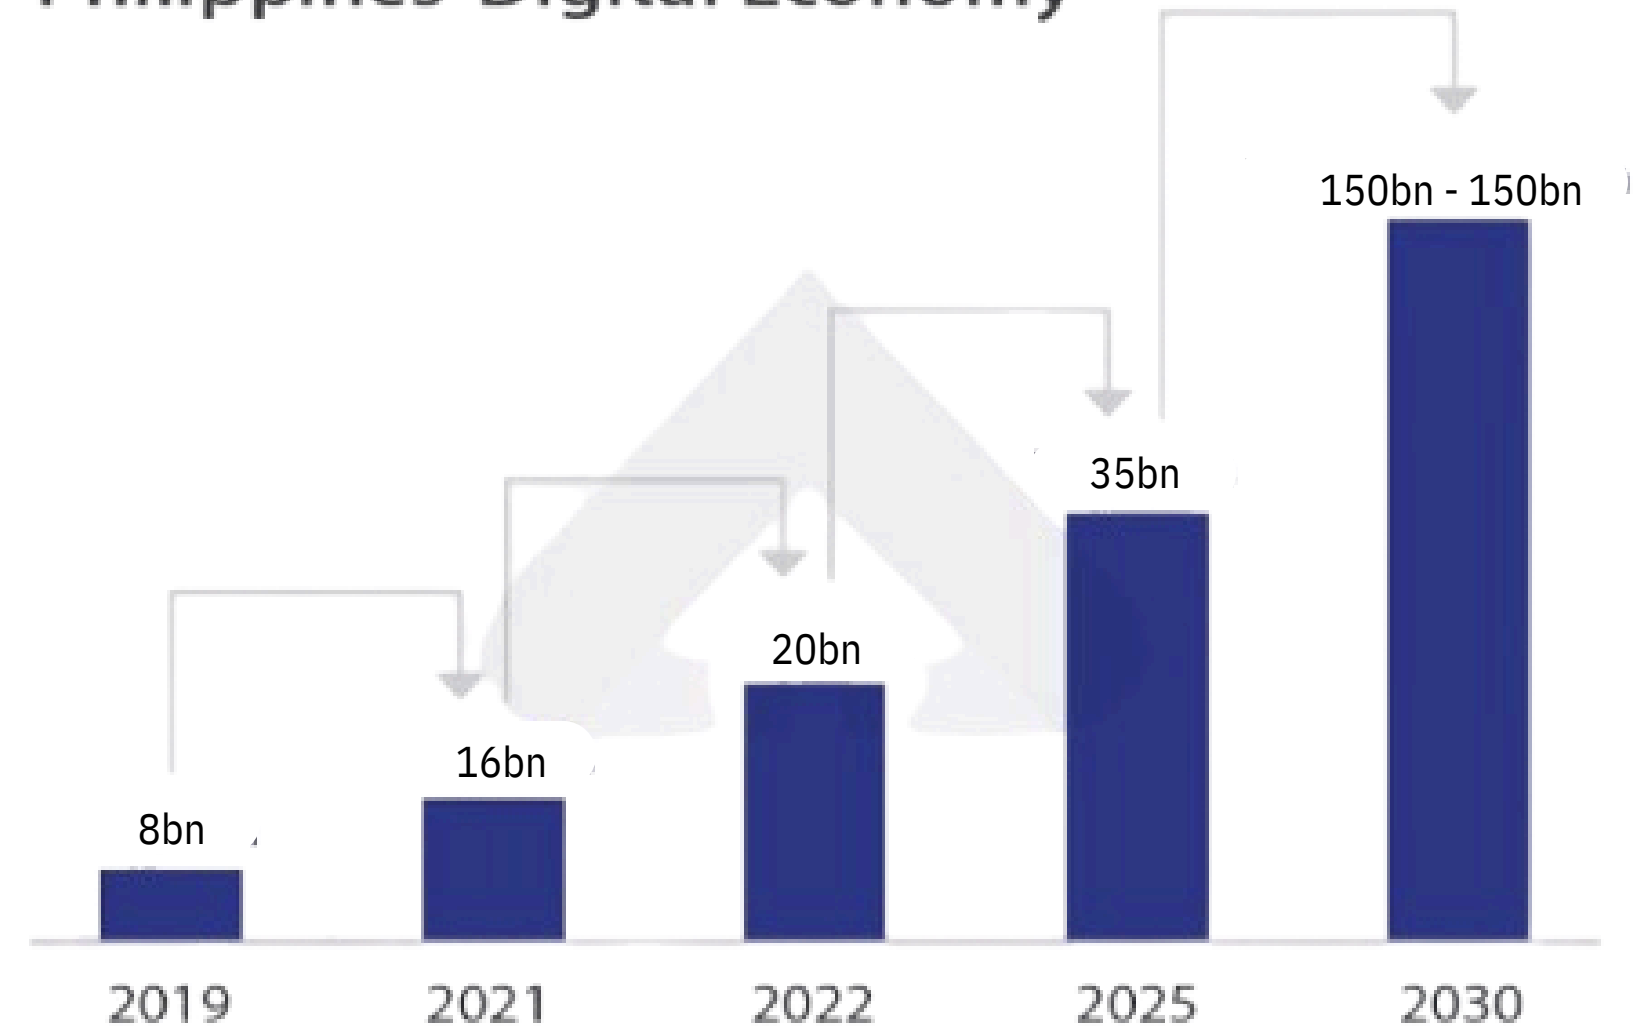

The gross merchandise value (GMV) of the Philippines' digital economy refers to the total value of goods sold through online platforms over a specific period. This metric reflects the growth and scale of e-commerce, digital services, and various online marketplaces in the country.

In recent years, the Philippines has seen significant growth in its digital economy, driven by increased internet penetration, smartphone adoption, and a young, tech-savvy population.

The GMV includes sales from e-commerce platforms, food delivery services, online travel, and digital financial transactions.
